Notify Design System

A calm, premium-but-practical UI kit for operational business SaaS—built for clarity, speed, and future localization.

D2 · One coherent system for D3–D9

Foundations: color, type & geometry

Tokens are restrained, legible, and localization-safe. Color communicates meaning—not decoration.

Core palette

Geometry

8 · micro gap

16 · control gap

24 · card padding

32 · section gap

48 · page margin

radius 4 / 8 / 12 · shadow only for elevation

Minimum interactive target: 48px

02 / 11

Persistent navigation, clear page context, and a single dominant action—so the app surface stays consistent while page content drives tasks.

OVERVIEW

Application shell example

+ Add Client

Content zone

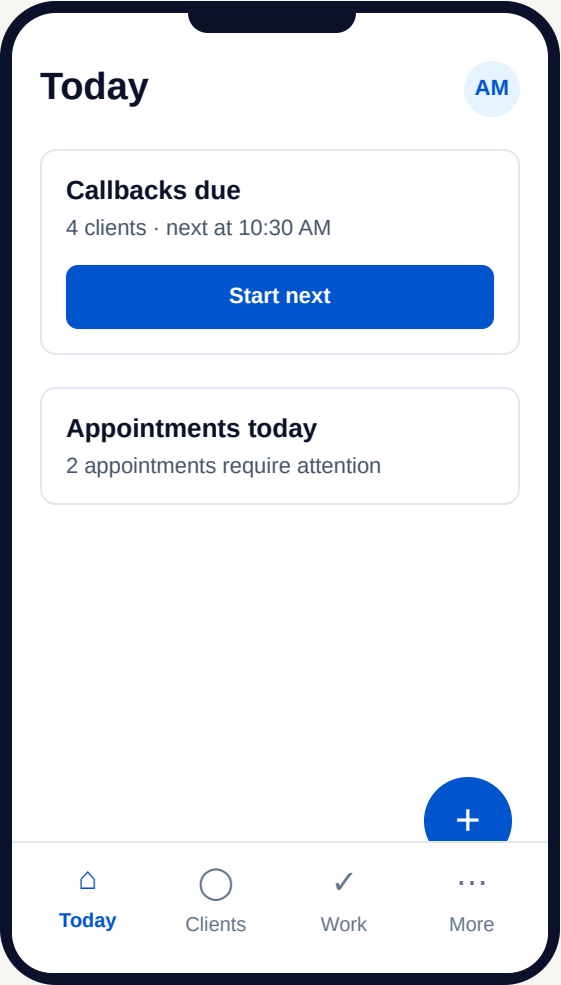

Decision context

Shell rule: primary navigation remains stable; page content carries the task-specific hierarchy and actions.

Mobile shell & global Add Client

A separate one-hand field surface—not a shrunken desktop sidebar.

01

Primary destinations

Today, Clients, Work, and More remain the four stable bottom destinations.

02

Safe FAB placement

+ Add Client floats above the bottom navigation with a 48px+ target and clear safe area.

03

Contextual actions

Appointments and expenses may appear in Today or context; no second global FAB is introduced.

Global meaning stays identical everywhere: + Add Client

Buttons & form system

One dominant action, clear field anatomy, and progressive disclosure for complex workflows.

Button hierarchy & states

Primary action

Secondary

Tertiary

Destructive

...

Disabled

Loading...

Rule: normal screens usually have one visually dominant primary action. Icon and compact actions belong in context or overflow, not beside every record.

Field anatomy · progressive disclosure

Client name *

Acme Coffee Roasters

Required field · expands naturally for longer localized labels

Amount (JOD)

1,240.000

Enter a valid amount.

+ More options

Localization-safe

Use logical start/end, expandable labels, and no fixed text widths.

Status, badges & daily work queues

Status is readable without color alone; queues make the next action visible.

Lifecycle & semantic statuses

Tables, cards & financial display

Decision-useful density on desktop; stacked, readable cards on mobile.

Operating Expenses · default list

DATE	EXPENSE	CATEGORY	ACCOUNT	AMOUNT
15 Sep	Office internet	Utilities	Operating	JOD 85.000
14 Sep	Vehicle fuel	Travel	Cash	JOD 42.500
12 Sep	Packaging supplies	Operations	Bank	JOD 120.000

Mobile transformation

Date · Expense	JOD 85.000
Utilities · Operating	Details ›

Rule: vendor, beneficiary, reference, payer, funding source, notes, and other metadata belong in detail—not the default list.

Financial summary cards

Cash available
JOD 8,420.000
Neutral · current position

MRR
JOD 3,250.000
+8.4% vs previous period

Outstanding
JOD 740.000
3 accounts require attention

Use positive/negative/neutral text and icons with restraint. Avoid making every financial state green or red.

Overlays, feedback & responsive rules

Keep context, communicate state, and mirror safely into future Arabic RTL.

Interaction patterns

Drawer

Fast contextual work without losing the current page. Contact Outcome.

Modal

Small confirmation or decision. Close Client.

Bottom sheet

Mobile contextual work with safe-area spacing.

Full page

Complex focused flow. Start Subscription.

Desktop → mobile

Drawer becomes bottom or full-height sheet; tabs become scrollable sections.

Layout transformation

Multi-column forms become single column; secondary actions move to overflow.

Reusable system states

Loading

Loading client details...

Empty

No callbacks are due. Add a client or review another queue.

Success

Outcome recorded successfully.

Validation error

Check the highlighted fields.

Requires review

This record needs attention before continuing.

Permission denied

You do not have access to this area.

Accessibility

48px targets, keyboard focus, visible focus, readable contrast, icon labels, clear errors.

Localization / RTL

Logical start/end, mirrorable nav and icons, flexible labels, no text in graphics.

Complete component reference board

One coherent system for D3–D9. Use the smallest component that supports the current decision.

Overlays & system states

Drawer for fast contextual work; modal for confirmation; mobile sheet for contextual work; full page for complex focused flow. Every component supports loading, empty, no results, success, validation error, permission denied, overdue, requires review, and closed/archive states.

Foundational rule: flat orthographic UI, hairline borders, minimal shadow, 48px minimum targets, logical start/end, expandable labels, and no production implementation in D2.
