Review Usage

Operational Rule: Free installation completion automatically creates a 3-day follow-up. It does NOT create a subscription or payment. The UI must clearly distinguish "Installed Free" from "Subscriber".

Validation Error

Please enter a valid phone number.

Success

Outcome recorded successfully.

Overdue

This follow-up is 2 days late.

Requires Review

Verify lead source before continuing.

Closed / Archived

Client history preserved.

Permission Denied

Admin access required for this area.

Desktop (1440px)

Persistent Sidebar

Full navigation visible at all times for fast domain switching.

Multi-column Workspace

Identity, main content, and timeline visible simultaneously.

Data Tables

High-density rows with multiple fields and inline actions.

Tablet (768px)

Collapsible Sidebar

Navigation moves to a hamburger menu or compact icon rail.

Stacked Workspace

Timeline and side panels move below the main content area.

Adaptive Tables

Columns hide based on priority; horizontal scroll or row expansion.

Mobile (390px)

Bottom Navigation

Primary destinations reachable with one hand (Today, Clients, Work, More).

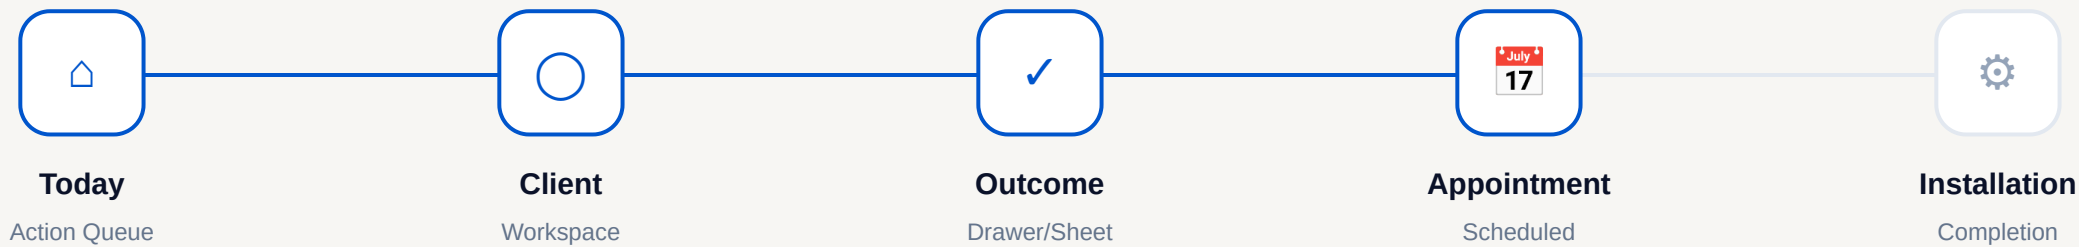

Actionable Cards

Tables transform into vertical cards prioritizing the next action.

Full-height Sheets

Drawers and modals become bottom sheets or full-screen overlays.

Daily Journey Consistency

One Reusable System

Whether entered from Today, the Client List, or the Workspace, the interaction for recording an outcome or scheduling an appointment remains identical. This ensures staff speed and reduces training requirements.

Operational Handoff

Every step in the journey is designed to lead to the next logical action. The UI never leaves a client in an ambiguous state; the "Next Action" is always the primary visual anchor.
